

Application Procedure for Erasmus/SEMP Incomings

* The Learning Agreement lists the modules/activities that an ERASMUS student will take at the host university. It is a three-way agreement between the student, the student's university and the host university and must be drawn up BEFORE the student begins to study at the host university. By signing the Learning Agreement, the student's home university confirms that the student's study programme meets their general syllabus and examination requirements so that credits can be transferred after completion of the ERASMUS semester.
